Professional Summary

Full-Stack Software Engineer with 3+ years of experience building scalable, high-performance web applications and AI-powered systems. Strong expertise in React/Next.js, Node.js/NestJS, and Python (FastAPI), with hands-on experience designing microservices architectures, optimizing PostgreSQL queries, and implementing distributed processing pipelines using Celery and Kafka. Proven track record of improving system performance by up to 70%, reducing latency by 40%, and delivering production-grade cloud solutions on AWS. Experienced in building context-aware AI applications using LangChain and vector databases, with a strong focus on performance, reliability, and clean system design.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python, SQL, Java, C++

Frontend: React.js, Next.js, Zustand, React Context, HTML5, CSS3, Tailwind CSS, ShadCN, Material-UI

Backend & APIs: Node.js, NestJS, Express.js, FastAPI, REST APIs, GraphQL, WebSockets

AI & Data Systems: LangChain, Pinecone (Vector DB), OpenAI APIs, AWS Textract, Background Job Processing (Celery), Kafka

Databases: PostgreSQL (Materialized Views, Query Optimization), MongoDB, Redis, MySQL, Supabase

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Terraform, CI/CD Pipelines, NGINX, Microservices Architecture

Tools & Practices: Git, Stripe API, RBAC, Agile/Scrum, Unit & Integration Testing, Sentry

Professional Experience

Software Engineer, TexAu — Building at Visalaw (gen.visalaw.ai)

July 2025 – Present | Pune, India

- Architected and implemented a scalable microservices-based system using NestJS, FastAPI, Celery, Supabase, and AWS for AI-driven legal document automation
- Built context-aware AI pipelines using LangChain and Pinecone vector database, enabling intelligent chat, document summarization, translation, and private GPT systems
- Reduced document processing latency by 35–40% through optimized background job orchestration (Celery), Redis caching, and API refactoring
- Designed and delivered end-to-end public APIs, expanding external integrations and increasing product accessibility
- Revamped the platform UI (Next.js v1 → v2), improving frontend performance by 25% via SSR, dynamic imports, memoization, and optimized state management (Zustand + Context)
- Integrated Stripe payment systems and implemented RBAC for secure multi-tenant workspace management
- Managed AWS infrastructure using Terraform, Docker, and CI/CD pipelines; improved observability using Sentry for production stability
- Contributed to technical foundation during 1.6M fundraising phases supporting product launch

Software Engineer, ZYKRR Technologies Pvt. Ltd.

June 2023 – June 2025 | Gurugram, India

- Spearheaded development of a Customer Experience (CX) management platform leveraging NPS and CSAT frameworks to deliver real-time analytics and actionable insights
- Improved production system performance by up to 70% through architectural optimizations, query tuning, and backend refactoring
- Designed PostgreSQL materialized view strategy for large-scale datasets, reducing query execution time by 40–50% and enabling faster reporting

- Led proof-of-concept development for Call Analytics, delivering 100% functional requirements in collaboration with cross-functional stakeholders
- Executed cloud migration initiatives on AWS, ensuring secure, scalable infrastructure and resolving critical security vulnerabilities
- Automated and optimized CI/CD pipelines, accelerating deployment cycles and reducing manual operational overhead
- Delivered enterprise-grade integrations with Salesforce, SFTP systems, and custom rule engines to enable seamless client interoperability
- Contributed to US market product revamp, improving scalability by 30% through database and API optimizations

Full Stack Developer, FlexiLancer – Pune, India

Oct 2022 – May 2023 | Pune, India

- Contributed to the development and optimization of a scalable e-commerce platform, improving transaction processing speed by 35% through backend query tuning and API enhancements
- Built a CRM module with real-time order tracking, reducing data retrieval latency by 30% and improving operational efficiency
- Optimized frontend rendering and API integration flows, increasing user engagement by 20% through faster and more responsive interfaces
- Assisted in automating CI/CD pipelines and deployment workflows, reducing release cycles by 45% while maintaining 99.9% uptime for production systems
- Collaborated with cross-functional teams in an agile environment to deliver customer-focused features and iterative product improvements
- Built full-stack event booking platform for movies, concerts, and events with real-time seat availability
- Developed intuitive user interface with advanced search, filtering, and seat selection features
- Integrated Stripe payment gateway for secure transactions and Kafka for managing high-traffic bookings
- Implemented WebSockets for real-time updates and AWS for cloud infrastructure deployment

Achievements

- Runner-Up, **Smart India Hackathon (National Finals)** – Competed among top nationwide teams to build scalable technology solution under problem statement of **DRDO**
- 6-Star Rated Programmer on **HackerRank** – Recognized for advanced problem-solving and algorithmic skills
- Winner, **Pune Municipal Corporation Innovation Hackathon** – Built and presented an innovative technology solution for civic challenges

Education

Bachelor of Engineering in Computer Science, AISSMS Institute of Information Technology, Pune

Jan 2021 – June 2023

- GPA: 9.1/10 | Relevant Coursework: Computer Architecture, Machine Learning Algorithms, Computational Theory, Cloud Computing, Data Science

Diploma in Computer Engineering, Government Polytechnic, Dhule

Aug 2017 – Nov 2020

- Percentile: 91.89 | Relevant Coursework: Data Structures, Operating Systems, Database Management Systems
